-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 28 February 2007.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1,3-9,11-13,15,16 and 19-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1,3-9,11-13,15,16 and 19-22 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SB/08)
 Paper No(s)/Mail Date _____.
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. _____.
- 5) Notice of Informal Patent Application
- 6) Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/28/2007 has been entered.

Claim Objections

2. The amendment filed 2/28/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Claim 21 recites "wherein the instruction received by the client from the server that instructs the client to display an advertisement does not include any of data of three-dimensional virtual space, model data, scenario data, and voice data". Any negative limitation or exclusionary proviso must have basis in the original disclosure. The mere absence of a positive recitation is not basis for an exclusion. See MPEP 2173.05(i).

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1-4, 6, 9-11, 13-15, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Heckel (U.S. Patent No. 6,036,601).** Heckel teaches a system and method of inserting advertisements into a virtual world that includes all of the limitations recited in the above claims.

Regarding claims 1-4, 9-11, 13-15, 19, and 20, Heckel teaches a server that sends an instruction to a client to show an advertisement (Column 3, Lines 37-43), and a client that displays a 3-dimensional virtual space and shows 3-dimensional advertisements (Column 4, Lines 59-67 and Column 5, Lines 1-5). Heckel also teaches a client as displaying an avatar controlled by the user (Column 2, Lines 46-53), and a predetermined position (plug-in) where the advertisement is to be shown (Column 3, Lines 52-57). Heckel teaches a memory storing an advertisement (inherently containing information on the item to be advertised) and movement of the advertisement (video clip advertisements have movement embedded in them which reads on changing a position) (Column 5, Lines 3-5). Examiner asserts that since applicant's 3-dimensional advertisement (and world) is displayed on a 2-dimensional display device, applicant's advertisement (and virtual world) is actually only 2-dimensional. A video clip has the same number of dimensions as applicant's advertisement (and virtual world), and in the

Art Unit: 3622

same way as applicant's invention, gives the perception of 3 dimensions. Thus, the advertisement video clips of Heckel (which inherently include modeling data that shows the clips to be animating) read on the 3-dimensional advertisement image in applicant's claims. The location and movement of the pixels of the video will alter depending on the location of the user avatar. For an example, see the images below:

When a user moves the avatar from the positioning in the first image to the positioning in the second image (moving forward and to the left), not only do the images in the virtual world change (such as the box), but the video also changes (where the pixels in the video as displayed will change to maintain the illusion of perspective). This is an inherent quality of 3-dimensional virtual modeling.

Regarding claim 6, Heckel teaches a memory storing outline IDs (plug-ins) (inherently sent to the client when the client plays the game), and displaying an advertisement in accordance with the outline data (Column 5, Lines 65-67 and Column 6, Lines 1-34).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 12, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heckel (U.S. Patent No. 6,036,601) in view of Kusumoto (U.S. Patent No. 6,954,728).

Regarding claims 5, 12, 21, and 22, Heckel doesn't specify audio in the game advertisements. Kusumoto teaches advertisements in a virtual world game that contain audio elements (Column 6, Lines 50-55). It would have been obvious to one having ordinary skill in the art at the time the invention was made to include audio in the advertisements of Heckel. This would draw more of the user's attention towards to advertisement. The instruction of Heckel is simply a request to display an advertisement (Column 4, Lines 38-43).

5. Claims 7, 8, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heckel (U.S. Patent No. 6,036,601) in view of Hunter (U.S. Pub No. 2002/0156858).

Regarding claims 7, 8, and 16, Heckel teaches a game that implements a virtual world (a fake representation of real surroundings). Heckel doesn't specify the

timing of advertisements. Hunter teaches a real world advertisement display that sells time slots to advertisers (inherently measuring an amount of time between advertisements and displaying appropriate ads at the necessary times) (Paragraph 0029). It would have been obvious to one having ordinary skill in the art at the time the invention was made to implement the real world advertisement display timing mechanism of Hunter in the virtual world advertisement display of Heckel. This would allow more advertising revenue to be gathered by the game server.

ALTERNATIVE Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. ALTERNATIVELY, Claims 1-4, 9-11, 13-15, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heckel (U.S. Patent No. 6,036,601) in view of Burke (U.S. Patent No. 5,848,399).

Regarding claims 1-4, 9-11, 13-15, 19, and 20, Heckel teaches a server that sends an instruction to a client to show an advertisement (Column 3, Lines 37-43), and a client that displays a 3-dimensional virtual space and shows 3-dimensional advertisements (Column 4, Lines 59-67 and Column 5, Lines 1-5). Heckel also teaches a client as displaying an avatar controlled by the user (Column 2, Lines 46-53), and a

Art Unit: 3622

predetermined position (plug-in) where the advertisement is to be shown (Column 3, Lines 52-57). Burke teaches a 3-dimensional virtual world in which a 3-dimensional advertisement for a real item (a model with outline data) is moved to a predetermined position within the virtual world at the request of a user (Figures 9-11). It would have been obvious to one having ordinary skill in the art at the time the invention was made to move the advertisement within the virtual world to allow the user to get a better view of the item or to show different facts about the item such as nutritional information as taught by Burke (Figure 11). In Heckel, the user is represented in the virtual world as a 3rd person figure. In Burke, the user is represented in the 1st person. A user must virtually walk up to the item for the advertisement to move in Burke. It would have been obvious to one having ordinary skill in the art at the time the invention was made for the 3rd person representation of the user of Heckel to move the advertisement according to proximity just as Burke does for the same reason as explained above, to get a better view of the item, etc.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bekerman whose telephone number is (571) 272-3256. The examiner can normally be reached on Monday - Friday, 7:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric W. Stamber can be reached on (571) 272-6724. The fax phone

number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
